24 February 1949

MEMORANDUM

TO: General Counsel

SUBJECT: [REDACTED] 25X1A

ENCLOSURE: Memorandum of 18 February 1949 [REDACTED] 25X1A
[REDACTED] on subject

25X1A

1. The enclosure was written on the basis of oral conversations with a representative of the General Counsel's Office. Since that date I have received additional information which leads me to believe that I may perhaps have misunderstood my previous conversations. Since this matter is of considerable importance to us and very vital importance to [REDACTED] will you please give me written confirmation of the following items:

a. Is the information contained in the enclosure substantially correct and, if not, what errors have been incorporated.

b. If a retired individual voluntarily waives his pension rights during a period of employment will he encounter any difficulty whatever or any prejudice in the event that he attempts to reinstate his pension upon termination of government employment.

c. Is it true that the Budget Officer does require a statement of waiver before he will employ a person who is now on pension and, if so, what form should such a statement take.

25X1A

2. If it is true (as I was recently informed) that a retired individual who waives his pension will have great difficulty in re-establishing his pension rights, it would make it very difficult for us to attempt to work out an equitable arrangement in order to obtain the services of [REDACTED]. If this situation is correct, how would you suggest that we proceed in order to obtain his services without causing him to lose his annuity rights that have a commuted value of at least \$50,000.

3. Since there

CONFIDENTIAL

25X1A

3. Since there is urgent need for [REDACTED] services and in view of the fact that we anticipate receiving a security waiver within the next few days, would it be possible for you to give us an expedited decision on the items presented in this memorandum. Thank you very much.
